Special Appreciation for the Conference Sponsors

energypact
foundation

The Energypact Foundation was established in 2007 in Switzerland as a non-profit and non-political organisation, and is now in the process of relocating to Vienna, Austria. Its mission is to promote the balanced use of energy sources with the objective of reconciling innovation, economic development and the protection of the environment. In order to better respond to threats to energy infrastructures, during the last two years, the EnergyPact Foundation has increasingly focused on cyber security for the energy sector. This focus is reflected in the foundation's vision:

An international collaborative community of technologically and risk informed leadership, researchers, implementers, and stakeholders for the development, sustainability, and security of energy production, transmission, and delivery to address today's challenges and tomorrow's needs.
